Winning Tongue Plate Bits

WTP Bit eradicates bit pinching which may cause the horse to put its tongue over the bit to avoid pain.

The unique design also enables the bit to remain central and flat over the tongue so the horse cannot get its tongue over the bit.

STABLEHAND
EQUINE PRODUCTS

www.stablehand.co.nz

Benefits

- Stops the bit pinching
- Stops the horse getting his tongue over the bit
- Stops the tongue hanging out the side of the mouth
- Stops displacement of the soft palate
- Stops abnormal respiratory noise thickness of wind
- Better oxygen supply therefore better speed
- Proven to help prevent bleeding at exercise (EIPH)
- Proven to improve performance
- Proven to reduce the horses heart rate

EquUs

The EquUs bone growth stimulator machine uses low intensity ultrasound to stimulate the upregulation of cartilage formation and maturation of the bone.

Aids in treating:

- Suspensory Ligament Injuries
 - Sesamoiditis
- Carpal Degeneration
- Hairline Fractures
 - Splints
- Tendon Injuries

STABLEHAND
EQUINE PRODUCTS

By accelerating the healing process horses may be able to resume training faster than horses not treated.

Benefits

- Non-invasive
- Accelerates recovery
- May improve quality of the repair
 - Easy to use
 - Available to hire
